

Muhammad Saad

Android / Mobile App Developer

+92-342-1184350 | chsaad973@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Lahore, Pakistan

PROFESSIONAL SUMMARY

Android developer with hands-on experience building and shipping native mobile applications using Kotlin, Jetpack Compose, and Firebase. Experienced across the full app lifecycle — architecture (MVVM), API integration, performance optimization, and Play Store deployment — with a full-stack foundation for end-to-end feature delivery.

EDUCATION

National University of Computer and Emerging Sciences (FAST)

BS Computer Science

Lahore, PK

Aug 2022 – June 2026

Relevant Coursework: Mobile App Development, Human-Computer Interaction, Software Engineering, Databases

EXPERIENCE

App Developer — TechTanic, Lahore, PK

Sept 2025 – May 2026

- Designed and shipped 4+ Android features end-to-end using Kotlin and Jetpack Compose, adopted by 4,000+ active users
- Refactored legacy XML-based screens to Jetpack Compose, cutting UI render time by ~25% and reducing crash reports by ~30%
- Integrated REST APIs and Firebase (Auth, Firestore, Cloud Messaging) to power real-time data sync and push notifications
- Wrote unit and UI tests that raised code coverage from ~40% to ~70%, and reviewed code within a 2-week Agile sprint cycle

Associate Software Engineer Intern — Invenxen, Lahore, PK

June 2025 – Aug 2025

- Developed core screens of the companion Android app for coupon discovery and redemption, integrating REST APIs that cut lookup time by ~35%
- Planned and built Huntigo, a MERN-based web platform enabling 50+ pilot business owners to launch AR-powered coupon promotions
- Collaborated with designers and engineers in Agile sprints, shipping incremental features on a bi-weekly release cadence

PROJECTS

KinderPal | Kotlin, XML, Python, TensorFlow, Android Studio

Sept 2025 – May 2026

- Designed and built an Android app that lets kids safely browse curated video content, giving parents control over what their kids access
- Engineered a custom AI content-classification model (TensorFlow/Keras) analyzing video titles, thumbnails, and transcripts, reaching ~90% classification accuracy

PulsePlay | Kotlin, Firebase, Python, Machine Learning, Git

Feb 2025 – May 2025

- Built an AI-driven recommendation engine that personalizes playlists from user listening behavior, improving match accuracy ~20% over random shuffle
- Integrated Firebase Realtime Database for live playback sync across devices, reducing playlist load latency by ~30%
- Optimized core Kotlin modules, cutting app cold-start time by ~15% and improving overall stability

Huntigo | MERN Stack, JavaScript, Node.js, Express, MongoDB, Android Studio

June 2025 – Aug 2025

- Architected a companion Android app for end-users to discover and redeem real-time coupons near their location

Additional Projects

- Chat App** (June – Aug 2024): Real-time MERN + Socket.io chat app supporting 100+ concurrent users at sub-200ms message latency.
- NGO Blood Donation System** (Mar – May 2024): .NET Core + MERN + SQL platform matching donors to NGOs, cutting coordination time by ~40%.
- Custom Language Compiler** (Jan – May 2025): C++-inspired compiler with Urdu-localized syntax (lexer, parser, semantic analyzer, code generator).

TECHNICAL SKILLS

App Development: Kotlin, XML, Jetpack Compose, MVVM, Firebase, Room, Android Studio, REST APIs

Web Development: MERN Stack (MongoDB, Express.js, React, Node.js), HTML, CSS, JavaScript

Artificial Intelligence: Python (NumPy, Pandas, Scikit-Learn), TensorFlow, Keras, OpenCV

Developer Tools & Other: Git, GitHub, Agile/Scrum, Visual Studio, MS Office
